The Official Manifesto and Doctrine of The Christian United Nationalist American Vanguard

By Gavin Eby

“Our Unity is a Strength; Our Faith is Our Courage”

The country is divided, nobody can **define** American Culture, **Our Mission** is to not only interpret fundamentally what our *founding fathers* planned for this country, but what our **God Has**.

The Official Manifesto and Doctrine of the Christian United Nationalist American Vanguard

"Faith, Strength, and Destiny—A Nation Reclaimed"

I. Purpose and Vision

The **Christian United Nationalist American Vanguard (CUNAV)** is founded on the **eternal truths of God, the sacred duty of national preservation, and the righteous path of order and strength**. Our mission is to **restore Christian morality, national sovereignty, and unity** in order to secure America's **destiny as a strong, disciplined, and spiritually guided civilization**.

American culture is not something that is reinvented—it is an identity rooted in **our founding principles, our people, and the effort to preserve it**. While America is diverse in background, **our unity must be built on shared values and historical foundations**. However, this culture is under **threat** from forces seeking to **redefine, dilute, or erase it**.

Our goal is not exclusion but **assimilation**—those who come to this land must **embrace our language, values, and traditions**. America is a nation of opportunity, but **opportunity demands responsibility**. Immigrants are not the enemy—the **failure of the government to enforce assimilation policies is**.

If the government refuses to protect our culture, then we must act. We will fight through **legal action, public demonstrations, and political engagement** to ensure America remains **strong, united, and true to its heritage**.

II. Core Principles

1. Christian Nationalism as the Foundation of Society

- America was founded on **Christian principles**, and its future must be guided by them.
- The state must uphold **Christian morality, laws, and ethics** to ensure a disciplined and righteous citizenry.
- We reject the influence of **corrupt secularism and globalist ideologies** that weaken national faith and heritage.

2. Sovereignty and Strength

- America must be **self-reliant, independent, and militarily unchallenged**.
- Foreign control—whether through **economic dependence, political manipulation, or cultural subversion**—must be eliminated.
- Leadership must be determined by **merit, strength, and unwavering loyalty** to the nation.

3. National Unity and Cultural Preservation

- A **unified national identity** must be reinforced through **language, shared traditions, and historical education**.
- The government must **implement structured cultural adaptation programs** to ensure newcomers understand and embrace the American way of life.
- **Cultural fragmentation must be rejected**—America is a melting pot, but it is one that **fuses people into a singular national character** rather than a collection of disconnected identities.

4. Economic Nationalism and Self-Sufficiency

- America's economy must **serve its people**, not foreign or globalist interests.
- National industries, agriculture, and resources must be **protected from exploitation**.
- A **state-guided economic system** should ensure that **strategic industries remain in American hands**, while private enterprise thrives under national interests.

5. Scientific and Technological Advancement Under Christian Ethics

- Technology must **serve humanity, morality, and national progress**.

- Research into **artificial intelligence, biotechnology, and neurotechnology** must be regulated to align with **national security and Christian ethics**.
- The state must control technological advancement **to prevent degenerative influences** from corrupting society.

6. Military and Internal Security Supremacy

- A **strong, elite military force** is essential to protecting national sovereignty.
- **Internal stability** must be ensured by **neutralizing subversive elements** that seek to weaken national unity.
- The **defense sector must be nationalized** to ensure self-reliance in **warfare, intelligence, and military technology**.

7. Ethical and Meritocratic Governance

- The government must be led by a **Vanguard of Christian nationalists**, chosen through **merit, discipline, and faithfulness** to the cause.
- **Decadence, corruption, and moral weakness** will not be tolerated in governance or society.
- **Religious and intellectual elites** must work together to **guide national policy in alignment with faith and reason**.

8. America's Divine Mission

- America is not merely a nation—it is **a beacon of strength and moral leadership** in the world.
- **National renewal must begin domestically**, ensuring that our people are strong before projecting power abroad.
- The values of Christian nationalism must be **defended and promoted globally through diplomacy, cultural influence, and where necessary, strength**.

III. The Role of the Vanguard

The **Christian United Nationalist American Vanguard** is not merely a movement; it is the **guiding force for national restoration**.

We are:
The Guardians of Christian Morality.
The Architects of National Strength.

The Enforcers of Order and Discipline.
The Defenders of Faith and People.

This path is not for the weak or the indifferent. It is a **calling for the strong, the faithful, and the righteous**.

IV. Call to Action

To those who hear this call—**organize, mobilize, and prepare** for the restoration of America.

Engage in legal and political activism.
Defend cultural institutions against ideological subversion.
Promote faith, discipline, and national strength.

We will not allow **our culture, our sovereignty, or our faith to be erased.**

For God. For Nation. For the Vanguard.
